

This listing of claims will replace all prior versions, and listings, of claims in the application.

*Listing of Claims*

1. *(currently amended)* A composition, comprising:
- a. at least one fatty material, wherein said fatty material is a fatty acid quaternary ammonium compound having amide functionality;
  - b. at least one ~~polymer selected from the group consisting of water-dispersible polyolefin,~~ water-soluble polyorganosiloxane having substituents, and water-dispersible polyorganosiloxane having substituents; and
  - c. at least one bleaching agent;  
~~wherein said fatty material is:~~
    - i. ~~a fatty acid quaternary ammonium compound having ester functionality;~~
    - ii. ~~a fatty acid quaternary ammonium compound having amide functionality;~~
    - iii. ~~a fatty acid alkoxylated quaternary ammonium compound;~~
    - iv. ~~a nonionic fatty acid ester;~~
    - v. ~~a fatty acid condensation product;~~
    - vi. ~~an alkylmethyl quaternary ammonium compound;~~
    - vii. ~~an amido alkoxylated quaternary ammonium compound;~~
    - viii. ~~quaternized amido imidazoline;~~
    - ix. ~~polyamine salt;~~
    - x. ~~polyalkylene imine salt; or~~
    - xi. ~~alkyl pyridinium salt; and~~

wherein said polyorganosiloxane is present at a level of at least about 35% by weight, based on the total weight of said fatty material, said polyorganosiloxane, said polyolefin, and said bleaching agent; and

wherein said substituents comprise at least about 5% by weight, based on the total weight of said substituents, of non-terminal hydroxyl groups.

2. *(cancelled)*

3. *(original)* The composition of claim 1,  
wherein said bleaching agent is hydrogen peroxide, inorganic peroxohydrate,  
organic peroxohydrate, or organic peroxyacid.

4. *(original)* The composition of claim 3,  
wherein said bleaching agent is hydrogen peroxide.

5. *(original)* The composition of claim 1,  
wherein said polyorganosiloxane has a melting point less than about 38°C.

6. *(original)* The composition of claim 1,  
wherein said polyorganosiloxane does not contain nitrogen.

7. *(cancelled)*

8. *(original)* The composition of claim 1,  
further comprising at least one emulsifier.

9. *(original)* The composition of claim 8,  
wherein said emulsifier is a cationic surfactant or a nonionic surfactant.

10. *(original)* The composition of claim 9,  
wherein said emulsifier is a cationic surfactant.

Claims 11 to 15 *(cancelled)*

16. *(currently amended)* The composition of claim 1,  
further comprising discrete, individual polymer particles, wherein said  
polymer particles are polytetrafluoroethylene.

Claims 17 to 18 (*cancelled*)

- .
19. (*original*) The composition of claim 16,  
further comprising at least one wetting agent.
20. (*original*) An aqueous composition, comprising:
- a. water; and
  - b. the composition of claim 1.
21. (*original*) The aqueous composition of claim 20,  
wherein said composition is in the form of an emulsion or suspension.
22. (*original*) A method of treating a textile, comprising the step of:  
contacting said textile with said composition of claim 1.
23. (*original*) The method of claim 22,  
wherein said textile is made from hydrophilic fibers, hydrophobic fibers or a  
combination thereof.
24. (*original*) The method of claim 22,  
wherein said composition is added to rinse water in a laundering process, or in  
a final scouring of a fabric finishing operation.
25. (*original*) The method of claim 24,  
wherein said composition is added to rinse water in a laundering process.
26. (*original*) A method of treating a textile, comprising the step of:  
contacting said textile with said composition of claim 16.
27. (*original*) The method of claim 26,

wherein said textile is made from hydrophilic fibers, hydrophobic fibers or a combination thereof.

28. *(original)* The method of claim 26,

wherein said composition is added to rinse water in a laundering process, or in a final scouring of a fabric finishing operation.

29. *(original)* The method of claim 28,

wherein said composition is added to rinse water in a laundering process.

30. *(original)* The composition of claim 1 further comprising at least one detergent.

31. *(currently amended)* A composition, comprising:

- a. at least one fatty material, wherein said fatty material is a fatty acid quaternary ammonium compound having amide functionality;
- b. at least one ~~polymer selected from the group consisting of water-dispersible polyolefin,~~ water-soluble polyorganosiloxane having substituents, ~~and water-dispersible polyorganosiloxane having substituents~~
- c. discrete, individual polymer particles ~~that are selected from the group consisting of polytetrafluoroethylene (PTFE), polyvinyl acetate (PVA), polyvinyl acetate/acrylic copolymer (PVA/a), and combinations thereof,~~ wherein said polymer particles are polytetrafluoroethylene;
- d. optionally, at least one bleaching agent; and
- e. at least one oxylated detergent;  
~~wherein said fatty material is:~~
  - i. ~~a fatty acid quaternary ammonium compound having ester functionality;~~
  - ii. ~~a fatty acid quaternary ammonium compound having amide functionality;~~
  - iii. ~~a fatty acid alkoxylated quaternary ammonium compound;~~
  - iv. ~~a nonionic fatty acid ester;~~

- ~~v. — a fatty acid condensation product;~~
- ~~vi. — an alkylmethyl quaternary ammonium compound;~~
- ~~vii. — an amido-alkoxylated quaternary ammonium compound;~~
- ~~viii. — quaternized amido-imidazoline;~~
- ~~ix. — polyamine salt;~~
- ~~x. — polyalkylene imine salt; or~~
- ~~xi. — alkyl pyridinium salt; and~~

wherein said polyorganosiloxane is present at a level of at least about 35% by weight, based on the total weight of said fatty material, said polyorganosiloxane, said polyolefin, and said bleaching agent; and

wherein said substituents comprise at least about 5% by weight, based on the total weight of said substituents, of non-terminal hydroxyl groups.

32. *(cancelled)*

33. *(original)* A method of treating a textile, comprising the step of:  
contacting said textile with a composition of claim 30.

34. *(original)* A method of treating a textile, comprising the step of:  
contacting said textile with a composition of claim 31.

Claims 35 to 36 *(cancelled)*
